

ReferralsPlus™

ReferralsPlus™

The ReferralsPlus™ is a closed-loop, electronic tool for facilitating seamless transitions across the care continuum. The system tracks referrals and closes the feedback loop, while eliminating unnecessary phoning and faxing.

The ReferralsPlus™ tool improves workflow and transparency throughout the life-cycle of the referral, builds clinical/ community linkages, enhances communication, protects patient privacy and the security of protected health information, and ensures that relevant information is communicated during the referral process in clinical and community-based organizations.

Benefits

-  Secure communication in real time
-  Statewide network of participating organizations
-  Customizable to meet specific workflow requirements
-  Eliminates unnecessary faxing & phoning
