

Historically, there have been a number of challenges in accessing the data needed to accurately assess social programs and create social risk profiles. The partnership between findhelp and Velatura will allow for the integration of social care, paving the way for an interoperable social care sector.

Angie Bass, EVP, Velatura HIE Co

Velatura HIE Co. is proud to offer:

## Community Care

Providing a safe, secure and effective platform, in partnership with findhelp, for participants to connect patients with social services.

### At a glance

#### CHALLENGES

- Finding social supports for patients
- Connecting patients to verified social supports
- Tracking the continuum of social care

#### BENEFITS

- Access and customize the open network social service directory
- Electronically refer patients to verified social supports
- Track and analyze SDOH activities

For more information, please contact [communitycare@velatura.org](mailto:communitycare@velatura.org)

### Objective

Organizations who track their search, referral, and outcome SDOH data are able to further their impact on the health and wellness of their patients and communities.

### Solution

- This FREE service allows providers access to community resources, enabling them to connect patients with the community-based organizations that provide critical social care services to those in need.

Discover new insights & take actionable steps to address health equity by accessing robust social care data, via standard reports or MySQL, and integrate it with other data sets. Velatura has two sites to offer:

- Patient site to connect directly with programs <https://communitycare.findhelp.com/>
- Provider site to allow care coordination, reporting, analytics and referral tracking: <https://hie-communitycare.findhelp.com/>
