

Your GREAT Health Funding deserves *deployment-ready* infrastructure

GRACHIE's FHIR-enabled platform maps directly to Georgia's GREAT Health eligible activities – and we can move within your 24 month grant window

THE CHALLENGE

GREAT Health funding requires rural providers to stand up data infrastructure, care coordination and population health capabilities – within a tight 24 month window, with no ongoing state obligations. Building from scratch isn't a viable option.

THE GRACHIE ADVANTAGE

As a GRACHIE participant, your organization already has an active connection to Georgia's health information exchange. The connection is the foundation. We can help you deploy the capabilities that qualify on a timeline your team can stand behind.

GREAT-ALIGNED CAPABILITIES

GRACHIE CAPABILITY	GREAT/AHEAD ALIGNMENT
FHIR-Enabled Data Exchange	EMR enhancements, standardized data sharing, modern API infrastructure
Population Health Reporting	Performance metrics, outcomes reporting, AHEAD model requirements
Care Coordination & Mapping	Connecting rural residents to the right care, discharge planning and transitions
Event Notifications	Reducing avoidable readmissions, ED utilization and transitions of care
Workforce Development	Go-at-your-own pace trainings on FHIR, USCDI and more

BUILDING NEW VS. EXPANDING YOUR GRACHIE CONNECTION

Starting from Scratch

- ✗ Months of procurement before work can begin
- ✗ Unproven timeline against 24 month grant window
- ✗ No existing statewide network connectivity
- ✗ Higher risk, higher administrative overhead

Expanding your GRACHIE Connection

- ✓ Active HIE connection already in place
- ✓ Proven track record across Georgia
- ✓ Connected to statewide network from day one
- ✓ Deployable within your grant timeline

Ready to plan your GREAT deployment?

Schedule a 30 minute call today. No pitch, no demo. Just an honest conversation about where GRACHIE fits your strategy and what's deployable within your grant timeline.
